

Meeting Tetouan

TECHNISCHE
UNIVERSITÄT
DARMSTADT

First impressions

First impressions of the first lectures (Waste management)

- All students are very dedicated
 - We could see, that they were working with the lectures and exercises until late in the evening
 - The students were very good in cases like calculation, chemistry and physics → they have received all the information very quickly (also in the exercises)
 - The questions in the lectures and exercises from the students to the professors have shown, that the they have already dealt with the information we provided before the lectures and during the lectures
 - students always wanted to know how the theoretic information from the lectures is used in praxis

First impressions of the first lectures (Waste management)

- The behaviour of the students was very respectful and helpful for the German professors
 - The students help the lecturers by technical problems
 - They have translated in cases of trouble from English to French or Arabic
 - They helped each other by problems with the „Drop-Box-Server“ and problems
 - And so on...

First impressions of the first lectures (Waste management)

- Also the lecturers were very helpful
 - Every time a professor from Tetouan, Marrakech and Tangier was present at the lectures
 - Help by technical problems
 - Help by language problems → translations
 - A very good cooperation in lectures, exercises and tests
 - Printing the test, translation of the tests, coordination, correcting the test, ...

First impressions of the first lectures (Waste management)

For all this, we would like to Thank all the lecturers and students for the support !!!

First impressions of the first lectures (Waste management)

- But, of course there were not only positive impressions
- The following problems have to be discussed:
 - The bad video connection in Tetouan → next time a “Plan B” would be very kind in the case of technical problems, so that we don’t lose too much time
 - The language problems of a few students → the evaluation of the final test in Marrakech have shown, that the English of the Students in Marrakech is good enough to follow the lectures and also to answer questions (oral and written) → **but what about Tetouan and Tangier?**

Next lectures in April/May 2012
First Draft

Hazardous waste management and treatment – medical waste management

- The next lectures will be take part in Tangier from April 30th to May 7th. (First week of lectures)
 - Prof. Dr. Lahl will give his five presentations about „hazardous waste management“
 - On Wednesday, the 2nd May and Friday, the 4th May, there will be also an exercise at the afternoon
 - On Monday the 7th of May, Prof. Lahl will teach his last unit and the students will have a mid term test
 - Test will be for all students (Tangier, Tetouan and Marrakech in English)
 - Mr. Jan Kannengiesser will collect the tests of all students and correct them
 - The test from Marrakech will be collected while the stay in Marrakech
 - The results of the test including the evaluation and marking will be send to the responsible colleagues

Hazardous waste management and treatment – medical waste management

- Depending on the SOWAEUMED workshop taking place in Marrakech the following options are possible:
 - The presentation of Prof. Lahl will be before the 11th or 12th of May:
 - The lectures of Mr. Marc Hoffmann about „medical waste management“ will take part in Marrakech
 - The presentation of Prof. Lahl will be at the 11th or 12th of May:
 - The lectures of Mr. Marc Hoffmann about „medical waste management“ will take part in Tangier on the 9th and 10th of May and Mr. Jan Kannengiesser will travel at the 10th or 11th to Marrakech
- Please discuss which of these options is realizable

Hazardous waste management and treatment – medical waste management

- For comparing the lectures with the Moroccan colleagues, the units (1-5) will be available on My-drive latest at the 16th of April
- The compared Units will be one week later available for the Moroccan students
- The lectures of Mr. Marc Hoffmann will be available one week before starting the lectures for the colleagues and the students
- We hope, that this will help to solve the language problems of the students and improve the cooperation between Moroccan lecturers and German lecturers

Modules de Prof. Schebek:

Gestion de L'environnement Industriel:

- entre le 25.06.12 et 06.07.12 à Tanger/Tétouan
- Enseignants: Liselotte Schebek, Wilfried Denz et Othman Mrani
